Medi One

One Part Base Nutrient For Organic Use

Medi-One is a balanced blend of organic ingredients that produce vigorous growth in the vegetative stage and resinous aromatic flora production in the flowering stage. Medi-One is also OMRI listed, which means that the ingredients that go into producing Medi-One are backed against industry standards for organic fertilizer production.

HOW IT WORKS

Medi One is our complete 1-part base nutrient formulated for the medical grower. It is a fully balanced blend of all-natural ingredients that produce vigorous growth in the vegetative stage and resinous aromatic flora production in the flowering stage. Our formula contains hydrolyzed fish soluble extracts that are slowly steamed to preserve the amino acids. This is blended with mined potassium sulphate to provide additional nitrogen (N), phosphorus (P), and potassium (K). These ingredients increase microbial activity in the grow medium, which helps the plant break down larger organic particles into a size that the plant can easily uptake and use. All of the components within Medi One are carefully assembled to make sure they form a complete and cohesive nutrient source that provides everything the plant needs in all stages of growth.

HOW TO USE IT

Shake bottle well prior to use. Apply the product at a rate of 1-5 ml/L (4-19 ml/Gal) of water twice per week. Adjust pH to the desired levels. Refer to the Medi One Feed Program for application rates during each week of plant growth.

For optimal results follow the Medi One Feeding Program during the plant's entire life cycle.

Product Benefits:

OMRI Listed

The formula for Medi-One is backed against OMRI's standard for organic fertilizer production. This ensures that the ingredients formulated in Medi-One are:

- Consistent
- Quality-Driven
- Organic
- Readily Available Elements

Unlike granular or powdered organic fertilizers, the elements in Medi-One are instantly bio-available.

Unique Ingredients

Medi-One is formulated from multiple organic sources including hydrolyzed, slow-steamed Atlantic Menhaden, sea kelp, naturally sourced potassium sulfate and a variety of micronutrients like copper, boron, manganese and zinc.

Award Winning

Medi-One helped grow Medi-Kush, winner of the Medical Cannabis Cup in 2011.
